EDUCATION

Sunbeam Pune, Pune, MH

Feb 2026 -- Aug 2026

Post Graduate Diploma in Advanced Computing (PG-DAC)

SKN Sinhgad Institute of Technology & Science (SKNSITS), Lonavala, MH

Feb 2020 -- Apr 2024

Bachelor of Engineering (B.E.), Computer Engineering

TECHNICAL SKILLS

Languages: Java, C++, C#, JavaScript (ES6+), Python

Frontend: React.js, HTML5, CSS3

Backend & Frameworks: Spring Boot, Spring MVC, JPA/Hibernate, ASP.NET Core, REST API Development, Django

Databases: MySQL, MongoDB, PostgreSQL

Core CS: Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Operating Systems (OS), Software Development Life Cycle (SDLC)

Tools & Platforms: Git, GitHub, IntelliJ IDEA, VS Code, Postman, Google Cloud Platform (GCP), MetaMask

PROJECTS

Online Quiz Application

3 Months

Java, Spring Boot, React.js, MySQL, ASP.NET Core, Generative AI, REST APIs

- Developed a full-stack online quiz application using React.js, Java Spring Boot, and MySQL, enabling students to take timed quizzes and instructors to create and manage quiz content.
- Designed and implemented role-based access control (RBAC) across 3 user roles (student, instructor, administrator), covering quiz management, user management, course management, and system statistics reporting.
- Built a REST API layer connecting the React frontend to the Spring Boot backend, and integrated a C# ASP.NET Core microservice for centralized application logging.
- Integrated Generative AI functionality to auto-generate quiz questions from a topic, delivering the full workflow end-to-end from creation and AI-assisted question generation to timed assessment and admin reporting.

Krypt -- Blockchain Web Application

3 Months

React.js, Solidity, Ethers.js, MetaMask, Web3

- Built a decentralized application (DApp) for cryptocurrency transfers using React.js, Solidity, and Ethers.js, integrated with Ethereum smart contracts.
- Implemented MetaMask wallet authentication, smart contract interaction, on-chain cryptocurrency transfers, and transaction history tracking.
- Connected the React frontend to blockchain smart contracts via Ethers.js, enabling users to initiate and confirm cryptocurrency transactions directly from the UI.
- Added keyword-based GIF integration to enhance the interactive, user-friendly experience of the transaction flow.

CERTIFICATIONS

- Google Cloud Fundamentals: Core Infrastructure -- Google Cloud

INTERESTS

Traveling, Watching Movies, Reading Books, Trekking, Listening to Music
